SO WHAT EXACTLY IS FINANCIAL LITERACY?
Financial Literacy is the possession of the set of skills and knowledge that allows an individual to make informed and effective decisions with all of their financial resources.

Financial literacy is the education and understanding of various financial areas including topics related to managing personal finance, money and investing.

Financial Literacy is a universal set of knowledge that people sometimes don’t understand at a young age. Many times because they don’t think it applies to them. Financial Literacy is more than understanding investing lingo, but more about understanding what choices today impact tomorrow.
A STUDENT’S PERSPECTIVE

- How I learned about this course
- My expectations for Financial Literacy
- Opportunities that came about for me
- How it pushed me to be a better student
WHY I CHOSE FINANCIAL LITERACY AND WHY MANY STUDENTS MAY NOT

For me...
- A friend
- It was conveniently 1 credit
- It was my first year and I needed knowledge

Why students may not..
- Don’t know meaning of financial literacy
- Not generally required
- There is not much awareness
